Foreword

This publication is one of a monthly series containing data on medical assistance payments made under Title XIX of the Social Security Act (Medicaid). Information is compiled and reported by each State and/or jurisidictional agency administering an approved Title XIX program on Federal Report Form SRS-NCSS-120: Monthly Statistical Report on Medical Care. Currently there are 54 such programs in 49 States, the District of Columbia, Guam, Puerto Rico and the Virgin Islands. Arizona has not initiated a Title XIX program and Massachusetts has a separate State agency for blind recipients.

Prior to January 1974, similar data were collected for the midmonth of each quarter and midmonth quarterly reports have been published in this series since May 1967.

Reports for the months of March, June and September will include quarterly summary data and in addition, reports for December will include annual summary data.

Information presented include medical payments by form of payment, payments to medical vendors by type of service, number of recipients in whose behalf medical vendor payments were made, and data related to screening services under the Early and Periodic Screening, Diagnosis and Treatment Program.

This report was prepared by Annie J. Mayfield under the direction of Henrietta Duvall, National Center for Social Statistics. Statistical assistance was provided by Robert Terrell.

Introduction

Medicaid (Title XIX of the Social Security Act) is an assistance program designed to provide medical assistance to specified groups of needy individuals. Such persons are classified into two main groups according to their maintenance assistance status, (1) those who are authorized to receive money payments for their basic necessities under public assistance programs such as Supplemental Security Income and Aid to Families with Dependent Children, and (2) those who are not receiving maintenance assistance payments even though they may, in fact, be eligible. There are extensions of the maintenance assistance status categories but uniform procedures do not exist for reporting such data. There are four basic eligibility requirements for medical assistance: (1) age 65 and over; (2) blindness; (3) permanent and total disability; and (4) membership in families with dependent children. In addition, some States have exercised the option of including other needy persons who do not fall into any of the above categories. Such recipients are classified as 'Other title XIX' recipients in the accompanying tables. Also, 'essential persons' (usually spouses) may also be eligible for medical care. For money payment recipients, these persons are usually classified according to the same eligibility factors as the recipient spouse.

Generally, payments are made out of Medicaid funds to vendors (providers) of medical services, directly or through a fiscal agent as the direct results of claims filed by the provider after services are rendered. Data presented in this publication are generated as an adjunct to the Medicaid claims processing and payment operation. Thus, information is based on bills paid and not services rendered during the month. Consequently, the data provided through this process are not professed to represent a true picture of the incidence of illness among Medicaid eligibles and are subject to fluctuations unrelated to the provision of medical care. Monthly data are collected and presented to meet pressing current demands for minimum information on medical care financed under title XIX. However, States are required to provide more significant and detailed annual data on the numbers of persons receiving medical services, the number of units of such services and the corresponding amounts of payments.

Except for payments, data related to screening services are not necessarily generated through the claims payment process. Numbers of individuals screened are usually based on services actually rendered during the report month. As a result, payments reported for screening services may be unrelated to persons receiving such services.

HIGHLIGHTS

Medical Assistance (Medicaid) Financed Under Title XIX of the Social Security Act - February 1975.

For the second consecutive month payments made out of Title XIX funds exceeded 1 billion dollars. February payments totalled a record 1.101 billion dollars. An estimated 8.6 1/ million persons had medical vendor payments totalling 1.06 billion dollars made in their behalf. An additional 3.8 million in vendor payments were made for screening services under the Early and Periodic Screening, Diagnosis and Treatment Program (EPSDT). There were concurrently 323,253 persons enrolled in Health Maintenance Organizations whose premiums were paid out of Title XIX funds.

Persons Served

More than half (55.9 percent) of the recipients for whom vendor payments were made were members of families with dependent children. Children under 21 who are members of families and other title XIX recipients under 21 represented about 38 percent of recipients. Twenty-three percent of the recipients were eligible on the basis of age 65 and over. Seventy-six percent of the medicaid recipients were also recipients of maintenance assistance in the form of money payments. Among members of families with dependent children under 21, ninety-one percent of the recipients were money payment recipients (AFDC).

Amounts of Payments by Groups of Persons Served

Forty percent of payments to medical vendor were for persons whose eligibility was based on age 65 and over. Thirty-one percent were on behalf of members of families with dependent children under 21. The proportion of payments (22.5 percent) on behalf of permanently and totally disabled recipients was greater than the proportion of medical payments for either adults or children in families. Among members of families with dependent children under 21, eighty-four percent of payments for medical care were made on behalf of persons also receiving money payments (AFDC), however, for the aged 65 and over, seventy-three percent of medical vendor payments were on behalf of persons who were not receiving maintenance assistance. Medical vendor payments for non-money payment aged recipients accounted for more than one-fourth (29.4 percent) of the total vendor payments. It should be noted that a large amount of these payments is probably made to medical institutional facilities which provide the basic necessities (food, shelter, etc.) and thus the recipients are not authorized for money payments for such needs.

Payments by Type of Services

About seventy-two percent of the medical vendor payments were made for inpatient services, i.e., hospitals (31.5 percent), skilled nursing

facilities (23.2 percent), and intermediate care facilities (17.0 percent). Among other services, physicians' services and prescribed drugs represented 9.5 and 6.5 percent of total payments, respectively.

Screening Services

Forty-nine States reported 151,257 children screened under the Early and Periodic Screening, Diagnosis and Treatment Program. Fifty-five percent of the children screened were six years of age and older. Forty-eight percent of children screened had referrable conditions uncovered and eighty percent of those with conditions uncovered were referred for diagnosis and/or treatment.

1/ Includes estimates for Colorado and Wyoming which were extrapolated from previous reports.

NOTE: Estimates are based on the average monthly amounts paid per recipient by State.

ANNOTATIONS

1. The following definitions apply to the symbols appearing in the detailed tables:

   --- indicates no data reported.
   *** indicates that the percent was not computed because the base was too small.
   Z indicates that the percent was less than 0.05.

2. Arizona has no title XIX program and is excluded from the tabulations.

3. Colorado and Wyoming did not report recipients or payments by maintenance assistance status and basis of eligibility of recipient and are excluded from all applicable tables. Montana reported recipients and payments by basis of eligibility only.

4. States do not always report premium or per capita payments into the SSA system for the aged and disabled recipients separately, as in Georgia, Maine, Vermont, and West Virginia where the payments reported under the aged category include payments for the disabled. For New York, data related to payments into SSA system were not reported. There were no payment of HMO premiums in February by Massachusetts. Hawaii reported recipient data only. Data were not reported by Utah.

5. Minnesota included HMO recipients and premium amounts in the data in Tables 2-14.

6. Data were estimated for New York and North Carolina and partially estimated for California and Michigan.

7. In addition to Colorado and Wyoming; Massachusetts, Nevada, Pennsylvania, and Utah are excluded from Tables 10-13 because children and adults in families were not reported separately. Connecticut, Illinois, Kansas, Minnesota, and West Virginia were able to report children and adults separately but were unable to differentiate medical vendor payments between adults and children in families. These States are excluded from the total percentage computation in Table 11. Pennsylvania did not differentiate Other Title XIX recipients by age and is excluded from Table 14.

8. For Utah, all adult recipient i.e., aged 65 and over, blind and disabled are reported under money payment not authorized even though some may be SSI recipients. North Carolina reported other title XIX recipients under 21 as children who are members of families.

9. Vermont excluded recipients of and payments of family planning services from the data reported in Tables 2-4 and 6-14.

10. For Virginia, vendor payments do not include $88,582 for non-ambulance transportation.

ANNOTATIONS--Continued

11. In some States, two or more types of medical services may be grouped together under one class, as in Connecticut where other practitioners', clinic, laboratory and radiological, home health, and family planning services are included in other care, and as in South Carolina, where skilled nursing facility services include payments to State mental institutions.

12. For some States, differences in vendor payment amounts between Table 3 and Table 5 are due to inclusion of retroactive cash adjustments which can be reported by type of services (Table 5) but which are not applicable to the recipients reported in Tables 2, 4, and 6-9.

Annotations specific for screening (Tables 15-20)

13. States omitted from tables either did not report on screening services for February 1975 or there were no individuals screened during the month.

14. California reported 70,445 individuals receiving comprehensive physical examinations in addition to the screening data.

15. For Georgia, EPSDT screening data related to specified conditions are excluded from the tabulations.

16. Screening payments for Idaho, Illinois, Georgia, Michigan, New York, Pennsylvania, and Texas are not reported separately by age.

17. In Indiana, the 2,736 persons screened during the month with referrable conditions uncovered were not referred for treatment because they were either currently receiving treatment for the condition or parent did not desire treatment.

18. Data for the District of Columbia, Massachusetts, Maryland, Ohio, Rhode Island, and Vermont are largely estimated and incomplete.

19. For Rhode Island, data include 84 newborns for whom payments are reflected in physicians' or hospital services. There were an additional 38 persons screened for whom detail information was not available.

20. Payments for screening services were not reported by the District of Columbia, Maryland, Massachusetts, Puerto Rico and the Virgin Islands.
